Waddle Community Support Token

BLUE-PAPER

Community:

A group of people bound by the fellowship of shared common attitudes, interests and goals

Our Shared History

The concept of the **Community Support Token** (1st Project of the Community Support Brand) was born out of the frustration many growing cryptocurrency communities face. Burned out developers who are stretched too thin to really take a token to the next level. That leaves frustrated investors who take losses, although the initial concept of the project was sound.

Although many of these projects don't make it, the communities that build up around them remain strong.

But finding safe cryptocurrency projects to invest in has become increasingly more difficult. Rugpulls and delayed honeypots are so frequent, many investors stand on the fringes of the cryptocurrency space because of fear.

We know what that fear is like. We've lost money to heartless scammers, and we know the pain of that loss. Because of those experiences, we've committed to make Community Support Token radically transparent from what you normally see.

Our developers will be openly doxxed, and we commit to making decisions through our community. We're here to grow a long-term project that has a genuine, real-world use case that is a feasible and profitable choice for investors.

One Brand – Three Pillars

Community Support Token

First Community-Led
Token 100% designed to
Fuel Self-Sustaining
Growth

Crypto & Local Communities

The Engine powering our
highly ambitious project
that aims to connect
Crypto to Mainstreet

Support Local Coin

Our Utility that will
Disrupt the SMB
Payment & Local
Commerce Space

Global Challenge - Our Solution

Today, whether in Crypto or on Main Street, the average investor, small business owner and consumer, stands little chance against powerful players, manipulated markets/pricing and the constant deluge of disinformation.

Community Support Brand (CSB) aims to level the playing field and put the power of crypto investment & main street commerce back in the hands of the majority.

Global Challenge - Our Solution

Through the introduction of Innovative concepts like **Tokenomic-Led-Growth, Community-Dev, Radical Transparency**, we believe **Community Support Token** will lastingly change the token landscape

Through our planned utility, **Support Local Coin** the first **100% Collateralized Stable Coin*** reserved only for small businesses & Individuals, We aim to disrupt the local-commerce landscape.

We are laser-focused on becoming the **1st Universally Accepted Currency by Small Businesses for products & services** and believe we will easily become a Top10 crypto on our journey to that goal.

***What if one digital currency wipeout could injure — or even destroy — the entire cryptocurrency ecosystem?**

[Learn more on how easily this could happen here](#)

Our Gameplan

Develop Support Local Coin

Hire the team that will build the 1st Dollar Pegged Currency universally accepted by Small Businesses around the Globe.

2

Launch Support Local Coin

3

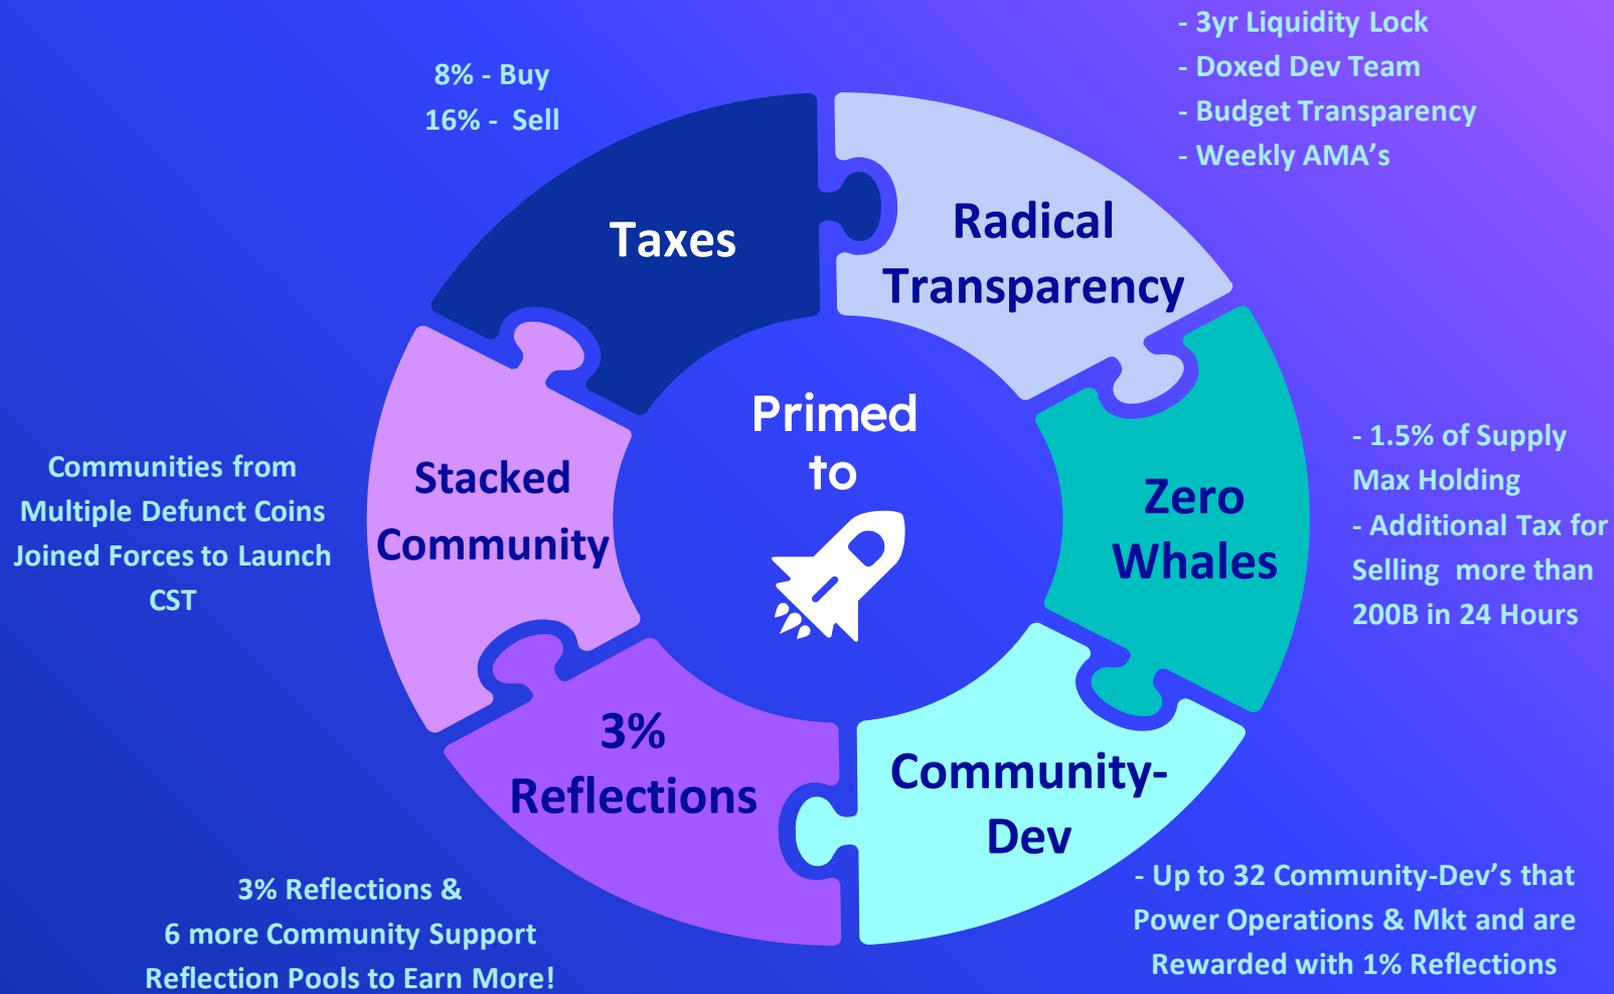

Launch to mainstreets around the world while continuing to develop additional FAB for consumers & SMBs

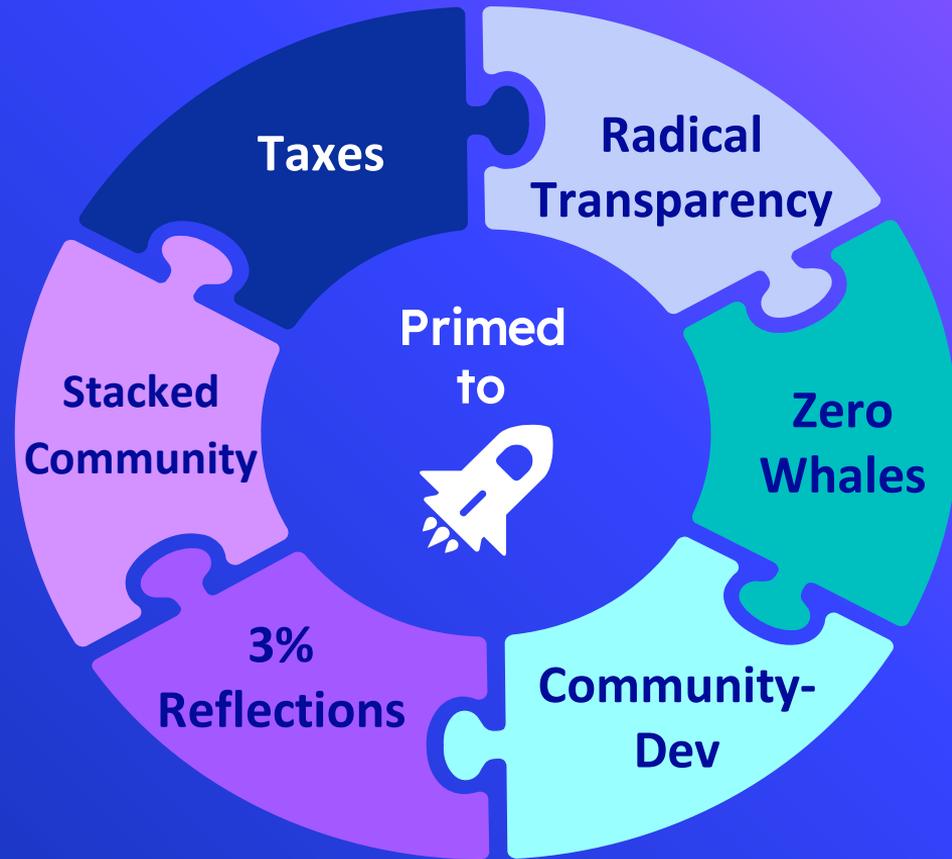

Launch Community Support Token

1

CST is the vehical that will mobilize the community, funds and resources needed to build and Support Local Coin and get it to Market

Community Support Token (CST)

Introducing Our concept of **Tokenomic-Led Growth**

Taking a token from the world of Meme's to the promised land is no easy feat. An attractive concept, mobilized community, strategic content and marketing, committed investors and an agile, professionally-managed operation are just some of the requirements to even have a chance.

Yet, 80% of meme coins enter the market as hobby projects. They're typically run by part-time developers who have bitten off more than they planned for. They hide in anonymity and lack vision and the ability to plan long-term. Community Support Token overcomes these issues by clearly mapping out our goals and a plans to achieve them and incorporating them into the Tokenomics of the Token.

One of the key elements of this project is the **Community Support Pools (CSP's)** where the Technomic's itself is designed to help move the project to success – **Tokenomic-Led Growth**

This is a concept we're pioneering to ensure the token is set up to succeed regardless of who's at the helm.

These pools represent important areas that a project needs to be successful: **liquidity, marketing, community involvement and project growth**. These pools are meant to help **empower community members**, fund growth projects over time, and give community members a chance to gain more passive income by helping the project's ongoing marketing.

In all, there are 6+ Community Support Pools to be rolled out over the course of several weeks, that are automatically supported & funded by CST's 8% Buy and 16% Sell Tax.

CST Community Support Pools (CSP's)

Supporting a Healthy team – Say Hi to Community-Dev.

Because so many hopeful cryptocurrency projects are abandoned by burned-out developers, we've thought long and hard about how to set Community Support Token up for success as a long-term project.

That means we need a solid team of developers sharing the workload right from the start. This will ensure that developers have time to rest and lead with fresh, clear minds. In addition to the core team of developers, up to 32 members of the community will also become part of the team before, during and after launch to help drive the project forward.

1% of every sell transaction will go to the Community-Dev CSP to compensate Community-Developers every week for their time and effort.

0.5% of every sell transaction will go to the Community-Dev Wallet CSP, where Community-Dev dictates how funds are spent on marketing initiatives

CST Community Support Pools (CSP's)

Don't do the marketing work for free! Get rewarded for it
Promote & Grow CSP.

We don't like the world shill. It sounds like unpleasant work.
Plus, what's in it for you?

We believe you should be rewarded for spreading the word
about Community Support Token.

**1% of every sell transaction will go to the
Promote & Grow CSP that rewards our
community members who spread the word**

CST Community Support Pools (CSP's)

Calling all creators! Deliver Content & get Rewarded Content Generation CSP.

If social media promotion isn't your thing, then you can create content for people to share on social media!

We reward those who create the content that empowers the community. From memes to banner ads, operational statements of procedure(SOPs) to graphic and video production, each day or week requests will come from Dev & Community-Dev.

Through a mix of lottery and community voting, winners will be rewarded with the CSP built up since the last award.

1% of every sell transaction will go to the Content Generation CSP to weekly compensate those that create the content that fuels our Project.

CST Community Support Pools (CSP's)

Weekly bonfires to burn supply and protect our token price

Burn And Win CSP.

Burning supply never hurts. Nor do prizes to Strangers & MVPs for their amazing work that week.

**1% of every sell transaction goes to the Burn
Wallet with 0.5% going to the Burn or Win CSP.**

Each week on Friday nights we'll get together on video for a happy hour drink and roll of the dice – will we burn more tokens or give the 0.5% to some lucky winners?

CST Community Support Pools (CSP's)

Rewarding those that grow their Bags – Investor Re-Buy CSP

No project can truly scale successfully without devoted investors who hold long term and buy strategically in dips. Yet most projects flood telegrams with worthless noise, but really don't show true love\$ to this vital investment group.

CST incentivizes long-term holding growth with 1% of every sell going to the Investor Re-Buy CSP.

Anywhere from daily to weekly, this pool pays out to holders that increase their holding %. Although the style of competition may change from week to week, the purpose does not.

At Community Support, we show Diamond hands love by rewarding them for growing their bags. Simple.

CST Community Support Pools (CSP's)

Let's make a difference – Community Support Foundation

Crypto can do more than just be an investment. We look forward to hearing from our community about great causes and charities making a difference that need some help.

Our donations are always on a local community level so that we can see the impact almost immediately.

1 % of every sell transaction goes to the Community Support Foundation CSP to fund smiles and meaningful change across the globe.

CST Community Support Pools (CSP's)

Standard Reflections & Tax – Dev & Marketing CSP

1% of every buy and sell transaction will go to the Developer

Marketing CSP so that we can work with the vendors, platforms and advertisers that will help us scale and get our message out to the world.

1% of each sell transaction will go to the Developer Tech CSP. This wallet is purely for tech development including website function, mobile apps and the many utilities we have planned for 2022.

We'll make mistakes, but we'll be transparent about it. We can't guarantee our marketing choices will be home runs each time, but our marketing wallets will be transparent so you can see how we spend and how much it helped the project

Community Support Token is Anti-Whale

No wallet can own more than 1.5% of the overall supply, no exceptions. We are a community project and thus believe we have a responsibility to everyone, not just those with the most resources.

For our larger investors under 1.5%, we'd love to see them think twice before making a large emotional sell decision. Hence, any sale up to 300-billion in a 24h period is taxed at the normal 16% sell rate.

Every token over that in a 24h period is taxed at a whopping 20%!

Not a fan? No worries, sleep on it and sell at the regular tax tomorrow. Or look at your 3% reflections, **they more than double to 8% on these larger sells.**

CST – Welcome to Radical Transparency

If you can't trust, don't invest.

That's our motto. To support our goal of building the most trusted community in the industry, Community Support Token is changing how transparency is measured in the crypto space.

- Our Development Team will be fully doxxed before launch
- Each member of the Community-Dev team may decide their Doxx Status– to each their own
- The Development team will hold an **AMA each Sunday**
- Can't make it Sunday? Ask your questions on Friday night at our Burn or Win Happy Hours
- Every local support pool, every wallet and every dollar spent is posted on a regular schedule
- **We'll make mistakes, but we'll be transparent about it.** We can't guarantee our marketing choices will be home runs each time, but our marketing wallets will be transparent so that the community can see how we spend and how much it helped the project
- One of our many Community-Dev roles is the **Head of Transparency and Visibility**. Their sole purpose is to provide visibility into operations and keep us all honest
- Straight talk that's cordial and real. Good news or bad news, we won't hide. We will lay it out as is, so that our community can make the best educated decisions around their investments

CST – Decency & Values matter in Our House

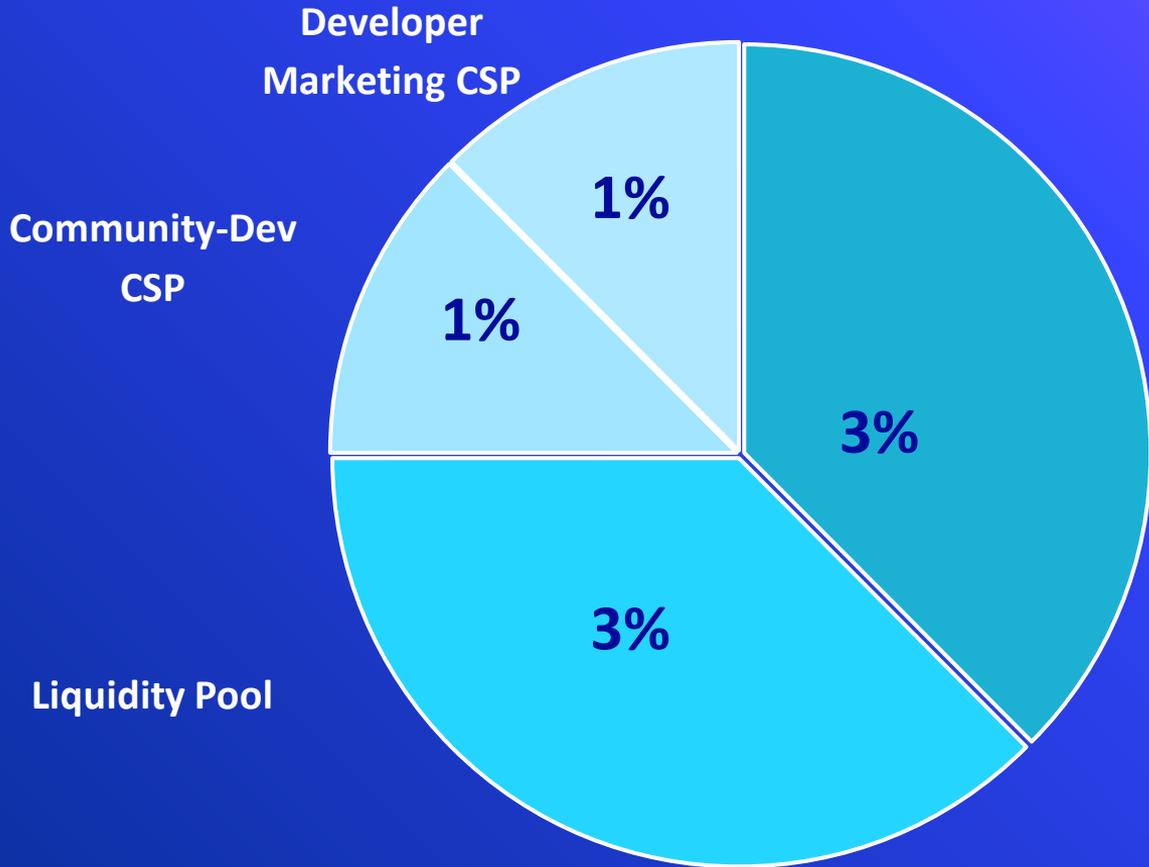

Communities thrive when there is love, respect, patience and acceptance for all humankind. We're building a community where everyone feels safe.

Do not invest in this project if you:

- You can't go two sentences without using profanity
- You need to show off your knowledge and skills by belittling others
- You mock others for their comments, choices, race, religion, nationality, politics, gender or creed
- You hate on sellers for selling their investments
- You can't summon patience for "normies" and new investors
- You carry yourself in a manner your Mom/Dad wouldn't be proud of.

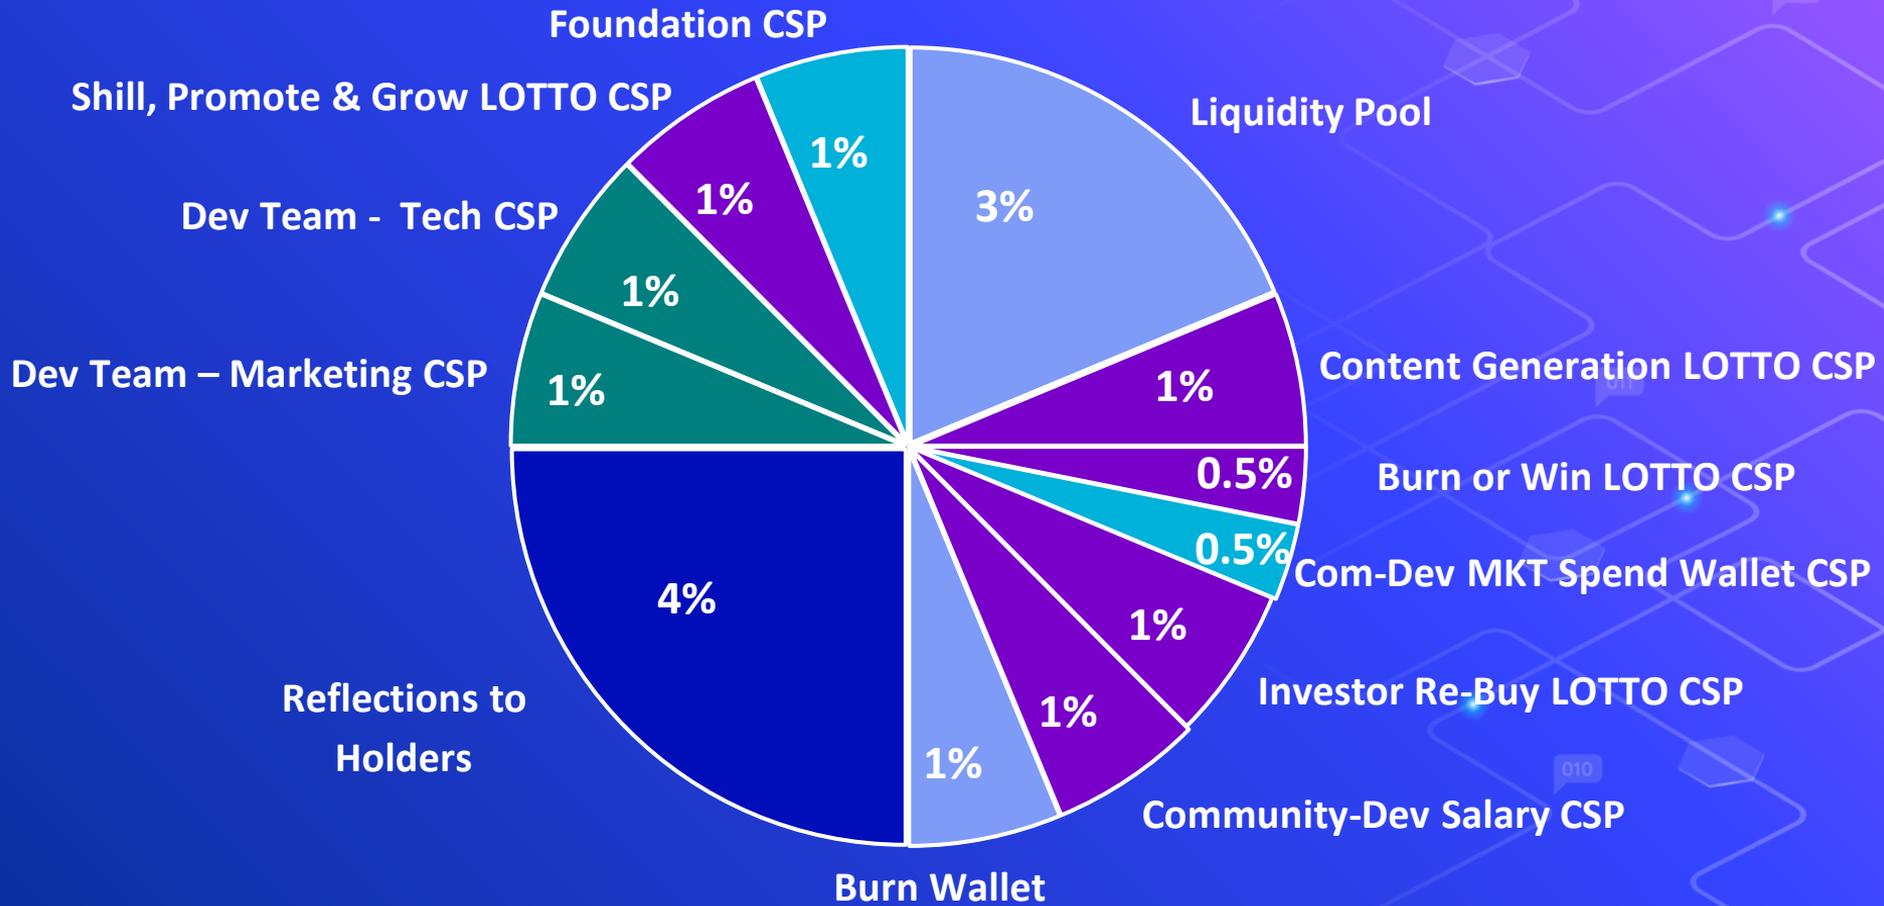

Tax - Tokenomics - 8% Buy

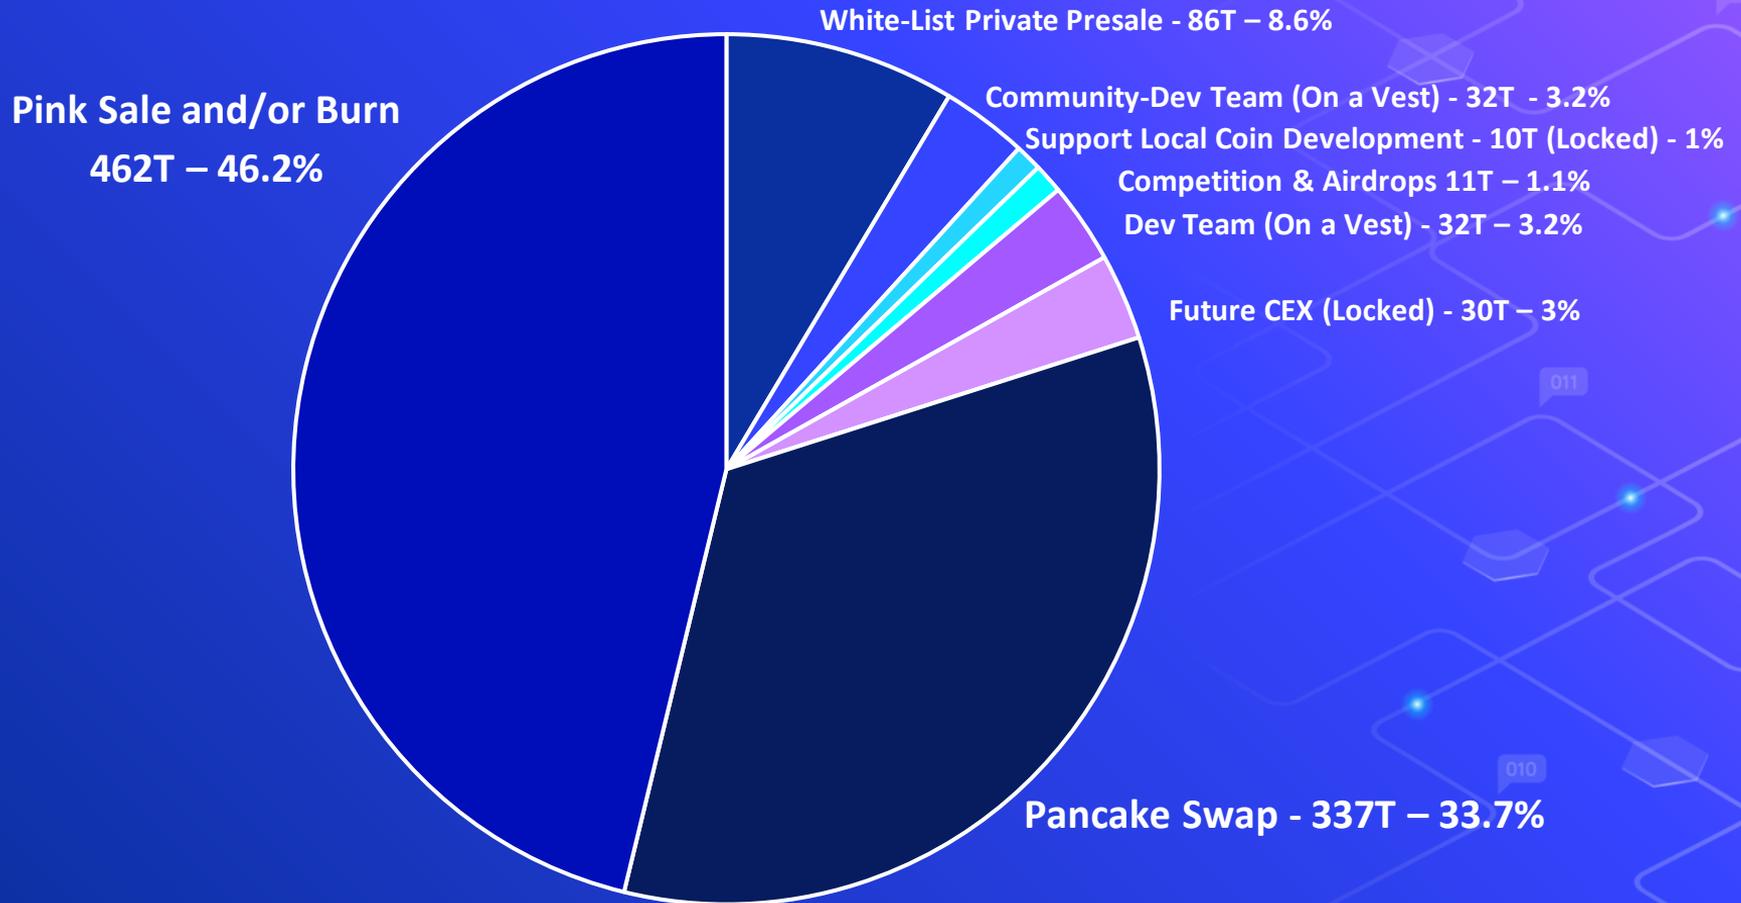

Reflections to Holders

CST - Tax Tokenomics - 16% Sell

Meet Our Custodians – (Dev)

Jason Wilson

Strategy & Finance

Jason Wilson, is an experienced business owner and a single full time father. His career path lead him to be a Marketing & Advertising Professional, leading to over 20 years' experience executing brand strategy and effective campaign management for his own businesses and that of his clients.

In recent years he has specialized in advising teams and organizations on delivering successful and measurable marketing campaigns that meet and exceed organizational objectives. His strong focus on data-driven outcomes and utilizing metrics to improve campaigns, led him to crypto where he felt decisions, campaigns and projects under utilized data in their strategies.

These and other circumstances have brought him to the CST project where he met Ian and the ComDevs in the telegram of yet another failed project that underutilized data.

He is looks forward to working alongside many passionate comdevs at CST as well as the wider community within this Crypto space.

Ian Bloembergen

Communications

Born and and raised in the Netherlands, Ian emigrated to the US to pursue an education in Marketing and Entrepreneurship. After graduating, he started his 1st business, a direct sales organization that he grew to 200 agents before exiting in 2008.

Over the next 10 years as a serial entrepreneur, he founded 5 companies with 3 failed projects and 2 successes including a BPO startup that grew from 8 to 300 employees in under 18mo before taking an exit.

As an entrepreneur and startup specialist, Ian learned the importance of having a strong and deep team to move projects forward which played a large part in the conception of CSTs community-led model designed to split the efforts needed over 32 Com-Devs.

In his free time, Ian prefers to spend time with his wife of 13yrs and his 3 children in South Carolina and acts as a custodian for CST focused on growth and communication.

Utility Support Local Coin

To Whom this may concern,

The concept for this has been in my head for over 7 years. Only now, with the advent of crypto can it become a reality. I have worked for shop local apps, daily deal sites, chambers of commerce and marketing agencies for over my 15 years of experience building platforms and marketplaces for small businesses.

Putting this to paper, will take as long as this white paper did. I will do so once we get closer to confirming this project will move forward. *If that is not good enough, no worries, this baby is all yours ;)*

That said, shop local is not the only utility we can have. Feel free to suggest more to us to add to the roadmap for 2022, should this project get launched.

Currently, I am employed by 280 Group, a global leader in product management training and optimization. Building products and getting them to market is what I do, and I do it very well.

Why? I'm sure you have noticed, I love it and am passionate about it.

best,

Ian Bloembergen

Community Support Brand & Token
